📍 Como, Italy

I'm a full stack web developer, graduated as "Superior Technician for Smart City & Energy Clean Management" in the biennial ITS / EQF5 course organized by "Fondazione Green" and its partners (Stiima-CNR and UniBs) and previously graduated from a three-year Technical School with the title of "Computer Technician". I'm a software development and digital art enthusiast, constantly improving my skills thought a "learn by doing" approach.

- Help Desk In-House.

PROJECTS

Dustbin IoT   Open Source

This project was conceived thesis for the biennial ITS course: "Superior Technician for Smart City & Clean Energy Management". It's an intelligent system for managing the refuse collection of a Smart City. It is a fully functional web application written in Python / Django and deployed in Heroku. As database it uses Postgresql leaning on the Django ORM, and Javascript, HTML and CSS for the frontend.

Hidden Folder   Open Source

Personal project that was born from my desire to hide some folders when leaving my usb to colleagues. The usefulness of this program is to hide any folder effectively from Windows OS interface even on USB devices, so that these folders remain hidden on different computers.

SKILLS

Technical
JavaScript/Bootstrap

Python/Django

PostgreSQL/MongoDB

Professional
Effective communication

Team player

Strong problem solver

Project management
